

## Ben Arpéa

Born in 1989 in Paris. Lives and works in Paris, France.

### Biography

Born into a family of art lovers and collectors, Ben Arpéa has been immersed in a rich artistic universe since childhood, where he began to create, draw and paint. He gained recognition in 2020 with a series of paintings in which he developed a singular artistic language made of geometric abstraction evolving towards the semi-figurative, using flat areas of color and texture. He pays homage to the figures of modern and contemporary art that he admires – Tom Wesselmann, David Hockney, Jonas Wood, André Breton – and is fully part of a new generation of creators from art, design and fashion, celebrating color and material in a simple and immediate relationship with the times.
